Business Sample - Current

Legion #300 Paver Project

You have or are in the process of purchasing a paver for the memorial section of the park.

Vision ahead twenty or thirty years, some future member of our community is walking through the paver area... will they know any of these people or their history? Being the project is in its beginning stages it would be good time to start and create a brief history of the purchased pavers. Please submit information about your veteran, the resident, business or organization for which you have purchased a paver.

For now, we will create a binder. And once pavers are set we can have some sort of historical walk of information for that area.

Thank you for your assistance in building this historical area. Return your narrative to the city office when you have completed it.

Thank you!

Can include: Who is this person/business?What is their connection/significance to the Lafayette area?

What are the years the business has been or was here.

How did it begin, why was it closed?

If a veteran, do you have specifics on where they served, when they served, and stories as to their service time.

Tell a brief story or narrative of this person, business or organization. Include a photo, etc.
